Subject: RE: Releasing excel PP data to FDEP?

Hunter, Sandra, and Greg,

A couple weeks ago LSASD said that the excel formats of data were for EPA use only and that LSASD preferred that only PDFs be released. We have received a request from FDEP (below) for excel data files. Since this is from FDEP is LSASD ok with our releasing the excel files to FDEP? If not, please let me know LSASD's specific concern regarding the release of excel files. While this request is not from the public, please keep in mind that Florida has a very liberal sunshine law.

Drew,

I need to check with LSASD regarding providing it in spreadsheet form because LSASD originally said they only wanted to release PDFs of data. Release was discussed broadly, without specifying FDEP, citizen or public website.

deliberative

Thank you,
Tara

Tara,

See below about the request from Florida for putting the data into spreadsheet form. I wanted to check with you before giving any additional files to them since I am not sure what the conversation was around just sharing the PDFs with Florida DEP.

Copying Chris cause I know he has been transferring the data into spreadsheets for his comparisons.

Good morning William,

Can you tell me if EPA has, or can, put the EPA split sample data in a spreadsheet format to make comparisons easier?

Thanks,

Dave
